FIG. 7 is a perspective view of the assembly 100 in a closed position, showing the engagement of the latching mechanism 150 with the locking mechanism 160. The assembly 100 includes a housing 102, a door 104, and a latch 106. The latching mechanism 150 is mounted on the door 104 and includes a latch bolt 152 and a latch body 154. The locking mechanism 160 is mounted on the housing 102 and includes a locking bolt 162 and a locking body 164. The latch bolt 152 is shown in a retracted position, allowing the door 104 to be opened. The locking bolt 162 is shown in an extended position, locking the door 104. The assembly 100 is shown in a perspective view, with the housing 102 and door 104 being the main components. The latching mechanism 150 and locking mechanism 160 are shown in detail, with their respective parts labeled. The assembly 100 is shown in a closed position, with the door 104 being latched and locked. The latching mechanism 150 and locking mechanism 160 are shown in a perspective view, with their respective parts labeled. The assembly 100 is shown in a perspective view, with the housing 102 and door 104 being the main components. The latching mechanism 150 and locking mechanism 160 are shown in detail, with their respective parts labeled. The assembly 100 is shown in a closed position, with the door 104 being latched and locked. The latching mechanism 150 and locking mechanism 160 are shown in a perspective view, with their respective parts labeled.
